Proposal 1: Glenda's Bakery

1. Organisation Overview

Name: Glenda's Bakery

Type: Small Business (Bakery)

Location: Soweto, Johannesburg

Brief History:

Glenda's Bakery was established in 2018 by Glenda Mthembu, a passionate baker who turned her love for baking into a thriving community business. What started as a small home-based operation, baking cakes and bread for neighbours and friends, has grown into a fully-fledged bakery with a storefront in the heart of Soweto. Glenda's Bakery is known for its freshly baked goods, including artisanal breads, custom celebration cakes, and delicious pastries. The bakery employs five local community members and sources ingredients from local suppliers whenever possible. Over the past eight years, Glenda's Bakery has become a beloved local institution, known for quality, freshness, and a personal touch that keeps customers coming back.

Mission Statement:

To bake joy into every loaf, cake, and pastry by using only the finest ingredients and delivering exceptional quality with a warm, personal touch.

Vision Statement:

To become the most trusted and beloved bakery in Gauteng, known for quality, community, and innovation in baking.

Target Audience:

· Local residents aged 25-65 looking for fresh bread, pastries, and celebration cakes

· Working professionals seeking convenient, quality baked goods

· Families celebrating birthdays, weddings, and special occasions

· Corporate clients ordering for office meetings and events

· Local cafés and restaurants requiring wholesale bread supply

2. Website Goals and Objectives

The primary goal of this website is to establish Glenda's Bakery's online presence, attract new customers, and streamline orders. Specific objectives include:

· Increase Sales and Orders: Make it easy for customers to place orders online, with a target of 25% increase in orders within 6 months.

· Showcase Products: Display the full range of products with descriptions, pricing, and high-quality images to entice customers.

· Build Brand Awareness: Tell the bakery's story and highlight what makes it special including fresh ingredients, local sourcing, and community involvement.

· Simplify Customer Enquiries: Provide a quick and easy way for customers to enquire about custom orders, bulk orders, and catering.

· Promote Special Offers: Highlight daily specials, seasonal products, and promotions.

· Drive Foot Traffic: Encourage customers to visit the physical store location.

Key Performance Indicators (KPIs):

· Online order enquiries per week: 20+ enquiries

· Website traffic monthly visitors: 500+ visitors

· Conversion rate from visit to enquiry: 10% or higher

· Social media follow growth: 15% increase

· Customer enquiry response time: Within 24 hours

3. Current Website Analysis

Current Status:

Glenda's Bakery currently does not have a website. The business relies primarily on word-of-mouth referrals, WhatsApp orders, a Facebook page with limited engagement, and walk-in customers at the physical store.

Weaknesses of Current Approach:

· Limited reach because only existing customers know about the business

· No central place to showcase products with pricing

· Manual order management is inefficient

· Missed opportunities for corporate and wholesale clients

· No ability to collect customer feedback or build an email list

· Difficult to promote special offers or new products

Opportunities for Improvement:

· A professional website will give the business credibility

· Online product showcase will attract new customers

· Automated enquiry forms will streamline order management

· Can reach corporate and wholesale customers more effectively

4. Proposed Website Features and Functionality

The website will consist of five core pages:

Homepage (index.html): This page welcomes visitors and showcases the bakery. It includes a hero image of fresh baked goods, a welcome message, featured products, daily specials, and a call-to-action button for ordering or enquiring.

About Us (about.html): This page tells the story and builds trust. It includes Glenda's story, bakery history, mission and vision statements, team members, and commitment to quality and local sourcing.

Our Products (services.html): This page displays products and pricing. It includes product categories such as Bread, Cakes, Pastries, and Specials, each with description, image, and price. It also includes options for custom orders.

Enquiry (enquiry.html): This page converts visitors to customers. It includes an enquiry form for custom cake orders, bulk orders, wholesale enquiries, and catering requests.

Contact (contact.html): This page provides access and directions. It includes a contact form, phone number, email, address with Google Map, operating hours, and social media links.

5. Design and User Experience

Colour Scheme:

The colour scheme uses warm, appetising bakery colours. The primary brand colour is Warm Brown (#8B4513). The secondary colour is Rich Orange (#D2691E). Cream (#F5DEB3) is used for background accents. Warm White (#FFF8F0) is the main background colour. Dark Brown (#2C1810) is used for text. Bold Red (#C0392B) is used for call-to-action buttons.

Typography:

Headings use "Playfair Display" which is elegant and gives a classic bakery feel. Body text uses "Nunito" which is clean, friendly, and highly readable.

Layout and Design Approach:

The design will be warm, inviting, and appetising. It will feature high-quality food photography with a clean layout and plenty of white space. The design will be mobile-first and responsive, using a card-based layout for product display.

User Experience Considerations:

The website will have intuitive navigation with clear menu labels. Prominent "Order/Enquire" buttons will appear on every page. Images will be optimised for fast loading times. Contact information will be easy to find. Product categories and pricing will be clearly displayed.

Low-Fidelity Wireframe for Homepage:

The homepage will have a header with the logo on the left and navigation menu on the right. Below the header will be a hero section with a large image of fresh bread display, the heading "Freshly Baked with Love", a subheading about artisanal breads, cakes and pastries, and an "Order Now" button. Below the hero will be a welcome section with a brief introduction about the bakery. Below that will be a featured products section showing three products in a grid. At the bottom will be a footer with copyright information and social media links.

6. Technical Requirements

Domain Name: www.glendasbakery.co.za

Web Hosting: Shared hosting such as HostGator or Bluehost

SSL Certificate: Free from Let's Encrypt

Programming Languages: HTML5, CSS3, and JavaScript

Frameworks: None, using vanilla development only

Responsive Design: Yes, using a mobile-first approach

7. Timeline and Milestones

Part 1: Planning, research, proposal, and HTML structure to be completed in Week 1-2

Part 2: CSS styling, responsive design, and visual enhancements to be completed in Week 3-4

Part 3: JavaScript functionality, testing, and final submission to be completed in Week 5-

8. Budget

Domain Name (.co.za): R150 per year

Web Hosting: R1,200 per year

SSL Certificate: Free

Stock Images: Free from Unsplash and Pexels

Professional Logo: Free from Canva

Total Annual Cost: R1,350

Proposal 2: Joe's Plumbing Services

1. Organisation Overview

Name: Joe's Plumbing Services

Type: Small Business (Plumbing)

Location: Johannesburg, Gauteng

Brief History:

Joe's Plumbing was founded in 2015 by Joe Ndlovu, a qualified plumber with over 15 years of experience in the industry. Starting as a one-man operation with a single van, Joe built his business through hard work, reliability, and exceptional service. Today, Joe's Plumbing has a team of five qualified plumbers and serves residential and commercial clients across Johannesburg and surrounding areas. The company is known for its 24/7 emergency service, transparent pricing, and commitment to quality workmanship. Joe's Plumbing has built a reputation as the go-to plumbing service for homeowners, property managers, and businesses.

Mission Statement:

To provide reliable, professional, and affordable plumbing services with integrity, transparency, and a commitment to customer satisfaction.

Vision Statement:

To be the most trusted and respected plumbing service provider in Gauteng, known for quality workmanship and exceptional customer service.

Target Audience:

· Homeowners aged 30-65 needing plumbing repairs and installations

· Property managers maintaining residential and commercial buildings

· Business owners requiring commercial plumbing services

· Real estate agents needing pre-sale plumbing inspections

· Emergency call-out customers needing urgent assistance

2. Website Goals and Objectives

· Generate More Leads: Convert website visitors into service enquiries and bookings with a target of 30% increase in lead generation within 6 months.

· Build Trust and Credibility: Showcase qualifications, experience, and customer testimonials to establish authority.

· Showcase Services: Clearly display the full range of plumbing services offered.

· Simplify Booking: Enable customers to easily request a quote or schedule a service.

· Promote 24/7 Emergency Service: Highlight emergency availability for urgent plumbing issues.

Key Performance Indicators (KPIs):

· Online quote requests per week: 15+ requests

· Phone calls generated from website: 20+ calls

· Service booking conversion rate: 25% or higher

· Customer review submissions: 5+ per month

3. Current Website Analysis

Current Status:

Joe's Plumbing has a very basic, outdated single-page website created by a friend. It lacks professional design and functionality.

Strengths:

· Basic contact information is available

· Trustworthy domain name

Weaknesses:

· Outdated design from the early 2000s style

· Not mobile-responsive

· No clear navigation

· No showcase of services

· No customer testimonials

· No enquiry or booking functionality

· Slow loading times

Areas for Improvement:

· Modern, professional redesign

· Mobile-responsive design

· Clear navigation with 5 pages

· Service showcase with descriptions and pricing

· Customer testimonials section

· Online enquiry and quote request form

· Image optimisation for faster loading

4. Proposed Website Features and Functionality

Homepage (index.html): This page creates the first impression and includes a call to action. It features a hero image, value proposition, services overview, trust badges showing certified and insured status, an emergency banner, and a call-to-action button to request a quote.

About Us (about.html): This page builds trust and credibility. It includes Joe's story, qualifications, experience, team members, company values, and customer testimonials.

Services (services.html): This page showcases all services. It includes residential plumbing, commercial plumbing, emergency services, installations, maintenance, and repairs, each with a description.

Enquiry (enquiry.html): This page converts visitors to leads. It includes a service enquiry and quote request form, emergency contact section, and availability calendar.

Contact (contact.html): This page provides full access. It includes a contact form, phone number, email, physical address with two or more locations, Google Map, and operating hours.

5. Design and User Experience

Colour Scheme:

The colour scheme uses professional, trustworthy colours. The primary brand colour is Deep Blue (#1A5276). The secondary colour is Sky Blue (#2980B9). Gold (#F39C12) is used as an accent colour. Light Grey (#F8F9FA) is the background colour. Dark Blue (#2C3E50) is used for text.

Typography:

Headings use "Montserrat" which is modern and professional. Body text uses "Lato" or "Roboto" which is clean and readable.

Layout and Design Approach:

The design will be clean, modern, and professional. It will be easy to navigate and mobile-responsive. Trust indicators such as certified, insured, and guarantee badges will be visible.

User Experience Considerations:

The website will have clear navigation with prominent "Call Now" and "Request a Quote" buttons. There will be quick access to emergency services and easy-to-find contact information.

Low-Fidelity Wireframe for Homepage:

The homepage will have a header with the logo on the left and navigation menu on the right. Below the header will be a hero section with an image of a plumber working, the heading "Reliable Plumbing Services You Can Trust", a subheading about 24/7 emergency service availability, and a "Request a Quote" button. Below the hero will be a "Why Choose Joe's Plumbing" section showing three trust badges. Below that will be a services section showing residential, commercial, emergency, installations, maintenance, and repairs. Below that will be a customer testimonials section showing two testimonials. At the bottom will be a footer with copyright information and a call now phone number.
